

**Governor's Call to Action:
Arizona Health Information Technology**

Arizona Governor, Janet Napolitano, signed Executive Order 2005-25 August 30, 2005. This order calls for the convening of a Call to Action Summit to solicit input and participation in the creation of an e-health information infrastructure for Arizona. It also calls for the establishment of a steering committee, to be chaired by the director of the Government Information Technology Agency, to comprehensively review issues surrounding the creation of an e-health information infrastructure for the state and to develop guidance (the Arizona Health-E Connection Roadmap) for the users of such infrastructure.

The Governor's Call to Action: Arizona Health Information Technology, in response to this order, is a summit of health care industry executives, hospitals, health plans, health care networks, health care providers, technology leaders, community leaders, and interested government agencies who will review issues surrounding the creation of the Arizona Health-E Connection Roadmap.
